ANNUAL REPORT
2019 - 20

United Way Bengaluru
EDUCATION AND LIVELIHOOD
Children's experiences in early life are responsible for the development of their cognitive, physical, social and emotional skills and thus succeeding in life. This development is further enhanced by supportive family, proper nutrition and health care, and so on. Our Born Learning Campaign seeks to address the needs of this critical age. Our objective is to create school readiness among children of 3-6 years of age through technical-based Early Childhood Education provided at Anganwadi centres.

This program seeks to ensure access to a holistic, optimal learning environment for the children which includes appropriate health, hygiene and nutrition awareness through the active involvement of the community stakeholders, specifically parent groups. UWBe launched the cyclic BLC Fellowship Training Program across 300 centres where the BLC staff, Anganwadi workers and helpers are trained in capacity building activities. We also integrated cost-effective, native-grown, healthy foods into children’s and in general, the whole family’s diet. Mothers also participated in the Poshakshala activity and developed teaching & learning materials with indigenous materials.

From 10 Balwadis (currently known as Anganwadis) in 2012, BLC has grown to 730 centres across the country.

UWBe is now Centre of Excellence for Born Learning Campaign across India. The BLC program’s exclusivity to the Anganwadis encourage parents to move from private pre-schooling to cost-effective traditional Anganwadi set-ups. This also ensures mingling of children from various backgrounds which builds good mind-sets in their early years.

Apart from the 3-6 age group, we also work in the primary education of school going children. At schools, we helped create Sikshana Student Clubs where students learn from each other through peer-teaching relationships so as to create a culturally rich environment. At the higher education levels, we focus emphasizes on skill-building initiatives for school drop-outs and those who are unable to find a place in mainstream education to get skilled thus leading to future sustainable employment. Apart from providing scholarships for economically backward but meritorious college-going students, we train youth under 5 domains of skill development – Assistant Beauty therapy, Industrial Sewing, Machine Operations, Food & Beverages, Retail Management and Customer Relationship Management – and they are placed with an average salary of Rs 15,000 per month.
BY THE NUMBERS
FINANCIAL YEAR 2019-20

TOTAL VERTICAL BENEFICIARIES
2.42 Lakhs

- 08 Locations
- 28 BLC Projects
- 700 Anganwadi Centers

School Development Program
Student Scholarship Program
Women Empowerment Program
Health and Nutrition Program
Road Safety Program
The Child Rights Day was celebrated at all Anganwadi centres.

Breast feeding awareness week was celebrated by creating awareness about the importance of breast feeding in the semi urban and rural locations.

Glimpse from Parent’s Day celebration at one of our Anganwadis.

Kitchen Gardening training was conducted for Mothers and community members at various Anganwadi centres in rural and urban Bengaluru.
ENVIRONMENT
With increase in global temperature, rising sea levels and disappearing green cover, if we do not act soon to protect our environment, the results will be disastrous. This requires us to model our interventions along the lines of sustainability. A huge part of environment-related concerns for Bangalore is the water crisis. We also understand that battling this problem requires us to look back to our sustainable ancestral practices and also incorporate biodiversity in increasing the green cover.

United Way Bengaluru took a conscious decision to address this concern in three different ways – through lake rejuvenation, watershed management and increasing biodiversity. These mutually reinforce each other.

**Lake Rejuvenation**
Bangalore, in specific, has been fighting the water crisis for quite a while. Rampant urbanization, felling of trees and brazen lake encroachment has led to severe shortage of water. Bangalore is bejeweled with numerous lakes. Unfortunately, most of them are on the brink of death.

Our Wake the Lake project works towards reviving these dying lakes, in the hope to bring them back to their original glory.

**Watershed Management**
Watershed management focusses on effective conservation of soil and water resources for sustainable production. It implies rational utilization of land and water resources for optimum and sustained production, with the minimum of hazard to natural resources.

**Biodiversity**
Increasing biodiversity is as significant as lake rejuvenation processes and watershed management when it comes to building environment sustainability. There are certain unique processes that we employ in increasing biodiversity.

We still have a long way to go. But with perseverance and consistency, we believe that we can bring about a positive change in our environment. Finally, we strongly feel that sustainability is not something only to be done. It is, most importantly, a mind-set. Let us promise ourselves to think and do sustainable.

On occasion of 150th anniversary of Mahatma Gandhi, Plog Run was conducted at 20+ lakes in Bengaluru. Location in the image is Parappana Agrahara.

Butterfly spotted in the butterfly theme park at Cubbon Park

Percolation Pit at Lalbagh

Keredepotasava at Uttarahalli Lake
RURAL RISING
As a non-profit organization, we realized that rural is as crucial as urban, if not more. There is no doubt that sustainable is the way forward. Most of our native technologies are sustainable in nature and the people also share the same mindset and employ such practices. In strengthening such a community, we are indirectly promoting sustainability. We believe in rising for the rural!

Under this vertical, we have tried to branch out in various directions by focusing our areas of intervention such as environment sustainability, education, youth success, economic livelihood and access to health in rural regions.

Nandi
Nandi Hills was the charming summer residence of Tipu Sultan. The well-known hill fortress is situated in the Nandi village. The once lush landscape of the village diminished as the Nandi lake dried up and along with it, its groundwater tables. The scarcity of water caused water bills to shoot up and its natural groves saw their own slow demise. In such a situation, we needed a 360-degree intervention into the village development. United Way of Bengaluru carried out this holistic intervention model this through three focus areas – watershed management, environment sustainability and education.

Hassan
Undoubtedly, United Way of Bengaluru believes in incorporating sustainability in all its projects. We introduced “student mini grants" which are grants for student-driven projects where a student leads a group that also consists of the panchayat development officer, a representative from the gram panchayat members (president/ vice-president/ members), a school teacher, elders, youth, women.

Sompura
Sompura has seen interventions in the areas of environment sustainability and watershed management. Both of them work hand-in-hand.

Doddaballapur
UWBe has tried to undertake projects towards the wellbeing of the villagers and livelihood options for women. These have been integrated for maximum efficiency.

Bangarpet
At Bangarpet, our interventions have been in the education field, economic mobility and watershed management.

Palakkad
We undertook extensive watershed management at Palakkad through wells, ponds, roof water harvesting, water absorption trenches, check dams and gully plugs.
BY THE NUMBERS
FINANCIAL YEAR 2019-20

• 06 Corporates
• 06 Villages
• 17 Interventions
• 40640 Lives Reached
• 35.9L KL Water Conserved
• 750 KLD Water Treated

OTHER ACTIVITIES

• Livelihood support for 110 Women
• 310 Rain water harvesting units
• 50 Pipe composting units
• 275 Open wells and Recharge wells
• 06 Gokatte creations
• 7500 Plantations
• 12 Lakes rejuvenated
• 08 Anganwadis refurbished
• 05 Government schools refurbished
• Education support to 480 students through scholarship
• 625 Nutrition gardens
• 01 Farmer produce organization
• Facilitated improved learning in 3891 students

Rain water harvesting unit provided at Sulthanpet, Chikkaballapur

Gunduthopu created at Nandi Grama, Chikkaballapur

Kalyani restored under Rural Rising at Nandi Grama, Chikkaballapur

Keredeepotasava at Uttarahalli Lake
VOLUNTEERING
Volunteering is something everyone is familiar with. But Corporate Volunteering can be new to many. At UWBe, we consider Corporate Volunteering as one of our crucial key projects. At the heart of it lies the desire to mobilize corporate employees in carrying our societal welfare activities. Given that Bengaluru is the silicon hub of India, we are very strong in our corporate strength and we use that number for delivering social work. While corporate jobs tend to keep people within the AC rooms, corporate volunteering lets them take a break from work - to do societal welfare! These activities will also help in socializing with one’s team mates thus helping to build stronger bonds amongst one another. After all, all work and no play definitely makes Jack a dull boy. Here, the “play” can help fight the plastic pollution war, help paint a child’s dilapidated school, or aid in reviving the dying lakes of Bengaluru. Amongst the various kinds of activities that we facilitate for the corporate volunteers, the main focus is the same as that which drives our individual volunteering events – to mobilize the caring power of the community. For most of our volunteering activities, we need large numbers for maximum output! This is where our corporate volunteers lend us a strong helping hand.

**Environment**

In the area of environment-related volunteering activities, the corporate volunteers mainly participate in plogging, paper-bag making, mulching, making bokashi and seed balls, and mural painting. Waste and Single-use PlasticFirst and foremost, we facilitate the plogging activity extensively where you pick up litter while jogging.

**Education**

Corporate volunteers also engage in making Training and Learning materials for children at Anganwadis. This makes the volunteers understand the need and importance of Early childhood education. During such activities, they create Training and Learning materials for children in Anganwadis between age of 0 to 6, which also encourages volunteers to support the children in learning process.

On a final note, United Way of Bengaluru plans to branch out into other areas of intervention too in future. If we all do not come together collectively to bring forth societal welfare, things are ought to look bleak. In mobilizing corporate volunteers for such activities, we not only promote Corporate Social Responsibility but also inculcate a sense of volunteering and giving in the individuals at a more personal level.

- Number Of Events: 188
- Number Of Volunteers: 16386
- Number Of Manhours: 32772
We thank our Anganwadi workers, mothers, children, cluster managers, staff without whom the victory would not be possible.

DAY OF ACTION 2019
WON 'GREATEST IMPACT' AWARD

As part of the Day of Action initiative of United Way Worldwide, Bengaluru chapter’s “Mothering Dreams” tried to highlight the importance of showing young children, who are our future, the road to foster sustainable development in a noteworthy manner. Anganwadi. Mothers. Recycling. These were the three cornerstones of our Day of Action.

United Way Bengaluru is proud to have grabbed the first place under ‘Greatest Impact’ category of an annual event, Day Of Action 2019.

Dear Partners,

A big thank you to all our network partners who celebrated Day of Action this year. We had more people than ever participate, collectively impacting 6,200+ children and adults in the region, almost double the number we benefited last year! Overall, 7,506 volunteers got involved, a huge increase on the 3,000 participants from 2018!

Greatest Impact
The judges have cast their votes and this time around we had a tie!

Congratulations to UW Bengaluru for their Mothering Dreams event, which involved recycling old materials to make new learning aids.

And congratulations to UW Chennai for their Month of Action, a campaign aimed at redefining the identity of those who are differently-abled by bringing focus to their strengths and talents.

We thank our Anganwadi workers, mothers, children, cluster managers, staff without whom the victory would not be possible.
We thank our partner, students, communities, staff and everyone who are behind this victory!

Students for a sustainable future

Student Mini-Grant wins ICC award

Our Student Mini-Grant project has won the prestigious ICC Social Impact Award under the Clean Water and Sanitation segment. Shortlisted among 70 entries across India, we competed alongside the likes of Vedanta foundation, Ambuja Cements, ACC, Reliance, SBI Foundation and many more. Aligned with the UN Sustainable Development Goal of Clean Water and Sanitation, we drove home clear messages of sustainability and community ownership in rural regions.
INDEPENDENT AUDITORS’ REPORT
TO THE BOARD MEMBERS OF
UNITED WAY OF BENGALURU

Opinion

We have audited the financial statements of UNITED WAY OF BENGALURU ("the Society"), which comprise the Balance Sheet as at 31 March, 2020, the Income and Expenditure Account for the year then ended and a summary of the significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements of the Society are prepared, in all material respects, in accordance with accounting principles generally accepted in India.

Basis for opinion

We conducted our audit in accordance with Standards of Auditing (SAs) issued by the Institute of Chartered Accountants of India (ICAI). Our responsibilities under those Standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Society in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Society’s Management is responsible for the preparation of the financial statements in accordance with the accounting principles generally accepted in India and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the entity’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the entity or to cease operation, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Society’s financial reporting process.

Auditors’ Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statement as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatement can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Society’s internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.

- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Society’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Company to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

LIVE UNITED®
United Way Bengaluru: Cleaning up lakes for a better future

G

"It's great to see the community coming together to clean up the lakes. It's a wonderful initiative to make our environment cleaner and healthier." - City Resident

AERIAL IMPROVEMENT

"The aerial view shows the extent of the clean-up efforts. The water is clearer, and the surrounding vegetation is thriving." - Environmental Expert
**Corporates pitch in to set up STP at Mahadevapura Lake**

The STP will treat 1 MLD of wastewater before discharging it into the lake every day.

Bengaluru: In a unique initiative, corporates have come together to partner with the United Way Bengaluru (UWBi), BBMP and Citizens’ Group to construct an eco-friendly 1 MLD Sewage Treatment Plant at Mahadevapura Lake in the city. Supported by Amazon, Mphasis, Deloitte Technologies, HTC Global and BORDA, the effort is aimed at rejuvenating the lake, which adjoins their offices at Bagmane World Technology Centre.

The STP will treat 1 MLD of wastewater in an adjoining drain and discharge it into the lake every day.

Dr. Shantaram B. Desai, vice-president and head of Corporate Social Responsibility at Mphasis, said, “The BBMP is the Project Owner and United Way of Bangalore, BBMP is the project coordinator, CSR partner: CSD develops in the Technical Consultant for this project.”

In an effort to rejuvenate the Mahadevapura Lake, the BBMP built necessary hydraulic structures (drainage channels) to divert wastewater from entering the lake. To take these efforts further, United Way of Bengaluru (UWBi), an NGO working on ‘Wake the Lake’ campaign for the last 9 years, was roped in as a CSR partner, and brought together other tech firms, like Amazon and Dell, to fund the STP.

UWBi works closely with the BBMP and state government for the approvals required to set up the STP at the lake. "It makes us happy that we have the support of civil society organisations and they are doing so much to make our city clean and green," said R.L. Prasadwar, Chief Engineer, BBMP.
