United Way Bengaluru (UWB), a non-profit organisation with 1,100 chapters across 37 countries, would be setting up digital classrooms in Dàvangere district of Karnataka. Over 6,500 students in 21 pre-university colleges owned by the government in Davangere district would benefit from these digital classrooms that would offer enhanced tutoring facilities.

UWB is executing this initiative in partnership with the zila panchayat of Davangere, and with support from Advanced Micro Devices India (AMD).

"The students in Davangere have the talent to outshine their peers if they are provided with the same infrastructure that the others have," said Gunjan Krishna (IAS), Commissioner for Industrial Development and Director, Department of Industries & Commerce, while announcing the project.

"No child must have to live with the regret that they did not get the opportunity to make their life better," said Jaya Jagadish, Country Head, AMD India & SVP, Silicon Design Engineering. AMD offers many schemes to enable STEM (Science, Technology, Engineering, and Mathematics) leadership for students.

Rajesh Krishnan, CEO, United Way Bengaluru, said, "The initiative of the zila panchayat will go a long way in bridging the gap and building talent while scaling incomes in Davangere."

Bengaluru, 21 October 2024: United Way Bengaluru (UWB) in partnership with Zila Panchayat, Davangere supported by Advanced Micro Devices India Pvt. Ltd. (AMD), has set up digital classrooms enhancing coaching for students in Davangere district. These smart classrooms have been set up in 21 Pre-University Government colleges in the district.

The Joint Entrance Examination (JEE) by the National Testing Agency (NTA) under the Ministry of Education (MoE), Govt. of India is the basis for students entering the engineering stream. Considered as one of the toughest examinations in India, the JEE is the gateway for pursuing engineering as a career for students. In recent years, the quality of coaching has become a crucial factor in the probability of students getting a college and stream of their choice. Many students have to move cities to get quality training which uproots them from their family and local communities; it is also a large financial burden for the families to sustain such an effort. These barriers are a key reason many students find it difficult to score well in the JEE.

Recognizing this gap in the system, the Zila Panchayat, Davangere embarked on bringing world-class infrastructure available in the metros to Davangere by expanding access to technology with new smart classrooms. The ease of access and locally available infrastructure aim to bring quality training infrastructure to those who otherwise could not afford to travel to metros and to girls who have an interest but could not find coaching infrastructure locally.

It is anticipated that more than 6500 students studying in Davangere will benefit from these digital classrooms.

Speaking on the occasion **Ms. Gunjan Krishna (IAS), Commissioner for Industrial Development and Director, Department of Industries & Commerce, Government of Karnataka** said, "Enhancing opportunities by providing quality learning is the cornerstone of increasing the per capita income of the district. The children in Davangere have the talent to outshine their peers if we can give them the same infrastructure that the others have. The effort made by United Way Bengaluru and AMD to come together and help enhance the possibilities for children from the district to become engineers is laudable."

Jaya Jagadish, Country Head, AMD India & SVP, Silicon Design Engineering said, "No child must have to live with the regret that they did not get the opportunity to make their life better. At AMD we draw from the societies we live in and Davangere is a prime example of how companies like AMD can build stronger and more resilient fraternities which contribute to nation building. Through our Corporate Social Responsibility initiatives, AMD provides many such enablement in STEM leadership for students. We are proud to have this opportunity to give back to society."

Speaking on the occasion **Mr. Rajesh Krishnan, CEO, United Way Bengaluru** said, "United Way connects partners, donors, volunteers, and community leaders to tackle the root causes of the world's most complex challenges while making a positive impact in the lives of millions of people. Together we are taking meaningful steps promoting inclusive and accessible education, ensuring that students have the tools they need to thrive in today's digital age. The initiative of the Zila Panchayat will go a long way in bridging the gap and building talent while scaling the incomes in Davangere."

Considered as one of the toughest examinations in India, the JEE is the gateway for pursuing engineering as a career for students. In recent years, the quality of coaching has become a crucial factor in the probability of students getting a college and stream of their choice. Many students have to move cities to get quality training which uproots them from their family and local communities; it is also a large financial burden for the families to sustain such an effort. These barriers are a key reason many students find it difficult to score well in the JEE.

Recognizing this gap in the system, the Zila Panchayat, Davangere embarked on bringing world-class infrastructure available in the metros to Davangere by expanding access to technology with new smart classrooms. The ease of access and locally available infrastructure aim to bring quality training infrastructure to those who otherwise could not afford to travel to metros and to girls who have an interest but could not find coaching infrastructure locally.

It is anticipated that more than 6500 students studying in Davangere will benefit from these digital classrooms.

*Speaking on the occasion **Ms. Gunjan Krishna (IAS), Commissioner for Industrial Development and Director, Department of Industries & Commerce, Government of Karnataka** said, "Enhancing opportunities by providing quality learning is the cornerstone of increasing the per capita income of the district. The children in Davangere have the talent to outshine their peers if we can give them the same infrastructure that the others have. The effort made by United Way Bengaluru and AMD to come together and help enhance the possibilities for children from the district to become engineers is laudable."*

***Jaya Jagadish, Country Head, AMD India & SVP, Silicon Design Engineering** said, "No child must have to live with the regret that they did not get the opportunity to make their life better. At AMD we draw from the societies we live in and Davangere is a prime example of how companies like AMD can build stronger and more resilient fraternities which contribute to nation building. Through our Corporate Social Responsibility initiatives, AMD provides many such enablement in STEM leadership for students. We are proud to have this opportunity to give back to society."*

*Speaking on the occasion **Mr. Rajesh Krishnan, CEO, United Way Bengaluru** said, "United Way connects partners, donors, volunteers, and community leaders to tackle the root causes of the world's most complex challenges while making a positive impact in the lives of millions of people. Together we are taking meaningful steps promoting inclusive and accessible education, ensuring that students have the tools they need to thrive in today's digital age. The initiative of the Zila Panchayat will go a long way in bridging the gap and building talent while scaling the incomes in Davangere."*

October 30, 2024

Karnataka is a state that ranks significantly higher in the country for its environmental sustainability. The state ranks first in generation of hydroelectricity and is also among the states with above average forest cover. Karnataka is also popular among tourists for its lush coffee plantations and delicious cuisine.

Bengaluru in Karnataka has become an IT hub in the last several years. Some of the top IT companies of the world have an office in Bengaluru and are hiring the top talents of the country. This has made Karnataka, and especially Bengaluru, a desirable destination for investment of CSR funds.

The Government of Karnataka is planning to formulate a policy as per which corporates operating within the state will have to direct their Corporate Social Responsibility funds to education. Karnataka Deputy Chief Minister D.K. Shivakumar recently spoke about this while addressing corporate sector representatives at the 47th Annual General Meeting of the Bangalore Chamber of Industry and Commerce (BCIC). According to the minister, the move will help address employment issues in the state.

In FY2022-23, Karnataka received Rs. 1985.55 Cr. through various CSR initiatives from 2534 companies. The top three areas of focus for the CSR programs were: education, health and environment, with an expenditure of Rs. 1110.16 Cr., Rs. 377.82 Cr., and Rs. 307.25 Cr. respectively in them. The top three spenders in the state included Infosys Limited (Rs. 180.4 Cr.), Biop Steels and Power Private Limited (Rs. 141 Cr.), and Wipro Limited (Rs. 117.68 Cr.).

Bengaluru, October 2024:

United Way Bengaluru (UWB) in partnership with Zila Panchayat, Davangere supported by Advanced Micro Devices India Pvt. Ltd. (AMD), has set up digital classrooms enhancing coaching for students in Davangere district. These smart classrooms have been set up in 21 Pre-University Government colleges in the district.

The Joint Entrance Examination (JEE) is the basis for students entering the engineering stream. Considered as one of the toughest examinations in India, the JEE is the gateway for pursuing engineering as a career for students. In recent years, the quality of coaching has become a crucial factor in the probability of students getting a college and stream of their choice. Many students have to move cities to get quality training which uproots them from their family and local communities; it is also a large financial burden for the

families to sustain such an effort. These barriers are a key reason many students struggle to score well in the JEE.

Recognizing this gap in the system, the Zila Panchayat, Davangere embarked on bringing world-class infrastructure available in the metros to Davangere by expanding access to technology with new smart classrooms. The ease of access and locally available infrastructure aim to bring quality training infrastructure to those who otherwise could not afford to travel to metros and to girls who have an interest but could not find coaching infrastructure locally.

It is anticipated that more than 6500 students studying in Davangere will benefit from these digital classrooms.
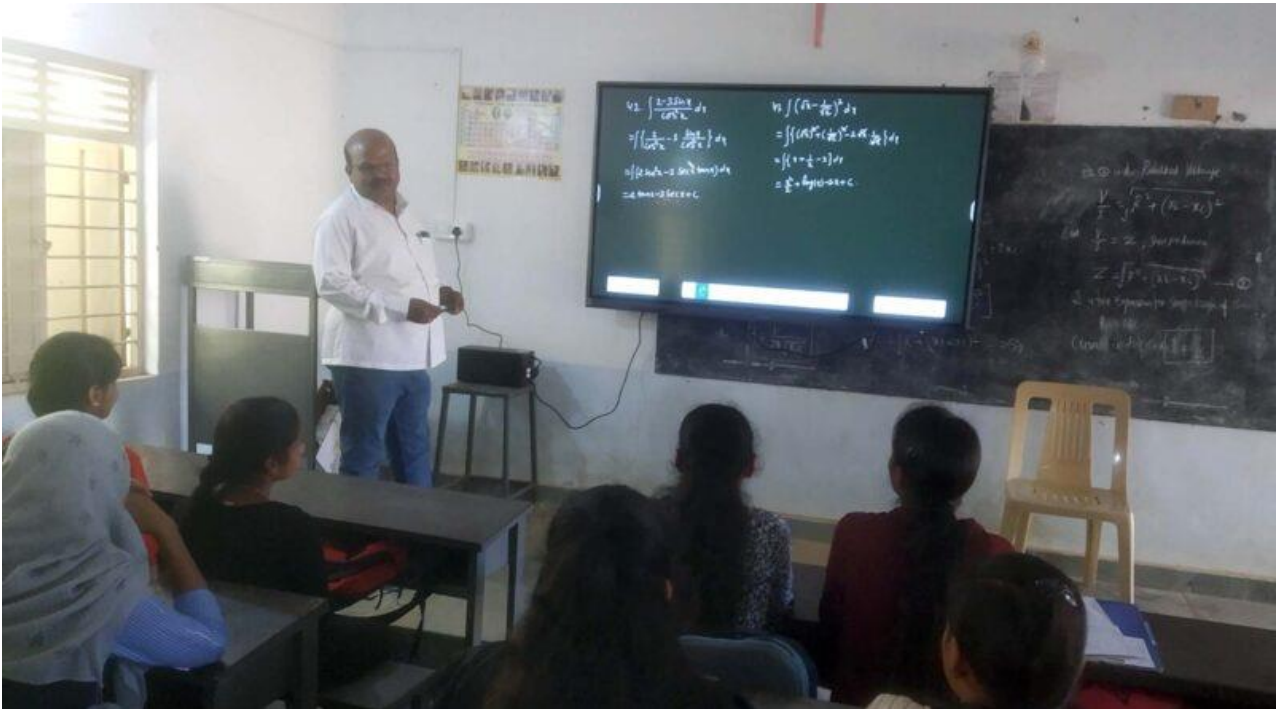

Speaking on the occasion Ms. Gunjan Krishna (IAS), Commissioner for Industrial Development and Director, Department of Industries & Commerce, Government of Karnataka said, "Enhancing opportunities by providing quality learning is the cornerstone of increasing the per capita income of the district. The children in Davangere have the talent to outshine their peers if we can give them the same infrastructure that the others have. The effort made by United Way Bengaluru and AMD to come together and help enhance the possibilities for children from the district to become engineers is laudable."

Jaya Jagadish, Country Head, AMD India & SVP, Silicon Design Engineering said, "No child must have to live with the regret that they did not get the opportunity to make their life better. At AMD we draw from the societies we live in and Davangere is a prime example of how companies like AMD can build stronger and more resilient fraternities which contribute to nation building. Through our Corporate Social Responsibility initiatives, AMD

provides many such enablement in STEM leadership for students. We are proud to have this opportunity to give back to society."

Speaking on the occasion Mr. Rajesh Krishnan, CEO, United Way Bengaluru said, "United Way connects partners, donors, volunteers, and community leaders to tackle the root causes of the world's most complex challenges while making a positive impact in the lives of millions of people. Together we are taking meaningful steps promoting inclusive and accessible education, ensuring that students have the tools they need to thrive in today's digital age. The initiative of the Zila Panchayat will go a long way in bridging the gap and building talent while scaling the incomes in Davangere."

United Way Bengaluru and AMD India enable digital classrooms in Davangere

team   Posted on 23 October 2024

Bengaluru, 23rd October 2024: United Way Bengaluru (UWB) in partnership with Zila Panchayat, Davangere supported by Advanced Micro Devices India Pvt. Ltd. (AMD), has set up digital classrooms enhancing coaching for students in Davangere district. These smart classrooms have been set up in 21 Pre-University Government colleges in the district.

The Joint Entrance Examination (JEE) by the National Testing Agency (NTA) under the Ministry of Education (MoE), Govt. of India is the basis for students entering the engineering stream. Considered as one of the toughest examinations in India, the JEE is the gateway for pursuing engineering as a career for students. In recent years, the quality of coaching has become a crucial factor in the probability of students getting a college and stream of their choice. Many students have to move cities to get quality training which uproots them from their family and local communities; it is also a large financial burden for the families to sustain such an effort. These barriers are a key reason many students find it difficult to score well in the JEE.

Recognizing this gap in the system, the Zila Panchayat, Davangere embarked on bringing world-class infrastructure available in the metros to Davangere by expanding access to technology with new smart classrooms. The ease of access and locally available infrastructure aim to bring quality training infrastructure to those who otherwise could not afford to travel to metros and to girls who have an interest but could not find coaching infrastructure locally.

It is anticipated that more than 6500 students studying in Davangere will benefit from these digital classrooms.

*Speaking on the occasion **Ms. Gunjan Krishna (IAS), Commissioner for Industrial Development and Director, Department of Industries & Commerce, Government of Karnataka** said, "Enhancing*

opportunities by providing quality learning is the cornerstone of increasing the per capita income of the district. The children in Davangere have the talent to outshine their peers if we can give them the same infrastructure that the others have. The effort made by United Way Bengaluru and AMD to come together and help enhance the possibilities for children from the district to become engineers is laudable."

Jaya Jagadish, Country Head, AMD India & SVP, Silicon Design Engineering *said, "No child must have to live with the regret that they did not get the opportunity to make their life better. At AMD we draw from the societies we live in and Davangere is a prime example of how companies like AMD can build stronger and more resilient fraternities which contribute to nation building. Through our Corporate Social Responsibility initiatives, AMD provides many such enablement in STEM leadership for students. We are proud to have this opportunity to give back to society."*

Speaking on the occasion ***Mr. Rajesh Krishnan, CEO, United Way Bengaluru*** *said, "United Way connects partners, donors, volunteers, and community leaders to tackle the root causes of the world's most complex challenges while making a positive impact in the lives of millions of people. Together we are taking meaningful steps promoting inclusive and accessible education, ensuring that students have the tools they need to thrive in today's digital age. The initiative of the Zila Panchayat will go a long way in bridging the gap and building talent while scaling the incomes in Davangere."*
